

At Tesco Underwriting we are committed to having an inclusive environment where everyone feels welcome and able to participate and achieve their potential. Where everyone is treated with dignity and respect, where talents and skills are valued and where everyone feels able to be themselves.

As part of this, we have become a signatory to the Treasury's Women in Finance Charter. This will enhance a workplace that already reflects the diverse society we live in and the Tesco customers we serve.

By signing up to the Women in Finance Charter we are demonstrating our support to gender balance across our business and we have committed to achieving 40% female representation in our senior management population by the end of 2020.

Attracting, recruiting and developing talented people into our business is highly important to us and we are excited by the opportunities this will present for our people.
